Cardinal I.G.

Dual-Seal Synthetic Warm Edge Construction

LoĒ Glass Coatings for Maximum Comfort & Savings

Cardinal's new LoĒ - 189™ Enhanced Performance Glass delivers a center of glass U-factor of just 0.20 when coupled with our LoĒ³ or LoĒ² glass and argon fill in a double-pane unit. Rather than absorbing internal heat, LoĒ - 189 reflects it back into the room, making your living space feel warmer and more comfortable. Cardinal's glass units with LoĒ - 189 deliver the industry's lowest failure rate – only 0.20% over 20 years.

Cardinal's LoĒ - 180 High Solar Gain Glass is the perfect cold remedy. Ideal for passive solar applications, it allows winter sun's heat to pass into the home while blocking heat loss to the outside.

Cardinal's LoĒ² - 272 Advanced Performance Glass delivers year-round performance and comfort, whether it's -20° F (-29° C) or 110° F (43° C) in the shade. In winter, it reflects heat back into the room. In summer, it rejects the sun's heat and damaging UV rays.

Cardinal's LoĒ³ - 366 ULTIMATE Performance Glass is the new standard for it delivers the perfect balance of solar control and high visibility – with no room- darkening tints and virtually no exterior reflectance. It provides the highest levels of year-round comfort and energy savings, making it the perfect glass for any location.

Low Maintenance Glass Option Makes Life Easier

Cardinal's Neat® naturally clean glass on the outside works by harnessing the power of the sun's UV rays to loosen dirt so water can simply rinse it away, leaving windows virtually spotless. Your windows stay cleaner longer and clean easier.

The World's Best Sealed Glass Unit

The Lowest Failure Rate for Sealed Glass Units in the World

Manufactured exclusively by Cardinal I.G., the world's premier Lo glass manufacturer, these sealed glass units are 45 times less likely to have seal failure over a 20 year period than any other manufacturer.

The Most Reliable Dual Seal System on the Planet

Our Air-tight glass units are sealed with PIB (polyisobutylene) - the only impermeable Elastomer in the world.

Superior Comfort & Performance with Multiple LoĒ Glass Options

LoĒ Glass Options allow you to maximize the comfort level of your home by reducing solar heat by up to 65% and UV radiation by up to 95%.

Completely Guaranteed with Laser-etched identification and Permanent Registration

Quality control and superior customer service is further ensured as each sealed unit is registered and on file with both Cardinal I.G. and Canadian Choice.

Superior Features

1. Leak Proof Performance

Our windows are made with an advanced ASTM approved acrylic system that eliminates unattractive rubber strips, which deteriorate over time, and securely bonds the sealed glass unit to the sash.

2. World Class Energy Efficient Glass Units

Glass units supplied from world class glass manufacturers featuring exceptional LoĒ Glass Coatings.

3. Optional Foam Insulation

Foam insulation will increase the thermal efficiency of the window.

4. Premium Hardware

Superior hardware increases the durability of our windows.

5. 100% Eco-Friendly & Recycleable

Constructed with the highest quality lead-free uPVC, our windows are UV resistant and will not fade, discolour, warp, crack or peel.

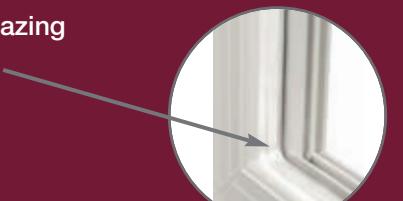

6. Maximum Strength Profile Corners

For increased strength, all frame and sash corners are fusion welded throughout.

7. Super Efficient Frames & Sashes

Multiple-chamber frames and sashes ensure greater thermal efficiency and excellent sound proofing.

8. Advanced Glazing Technology

Eliminates the use of black or rubber glazing strips

Making DraftLOCK more attractive and more energy efficient over time.

Better Sealed Glass Units
Better Constructed Frames & Sashes
Better Designed Windows

Canadian Choice Windows & Doors reserves the right to make product improvements or modifications in design and construction without notice. The color of foam and configuration of foam filled chambers may vary.

draftLOCK™ *plus*

Triple Glazed Casement Windows

Built to handle extreme weather conditions.

The draftLOCK *plus* Triple Glazed Window Frame is designed and constructed to handle the extra weight of a triple glazed glass unit.

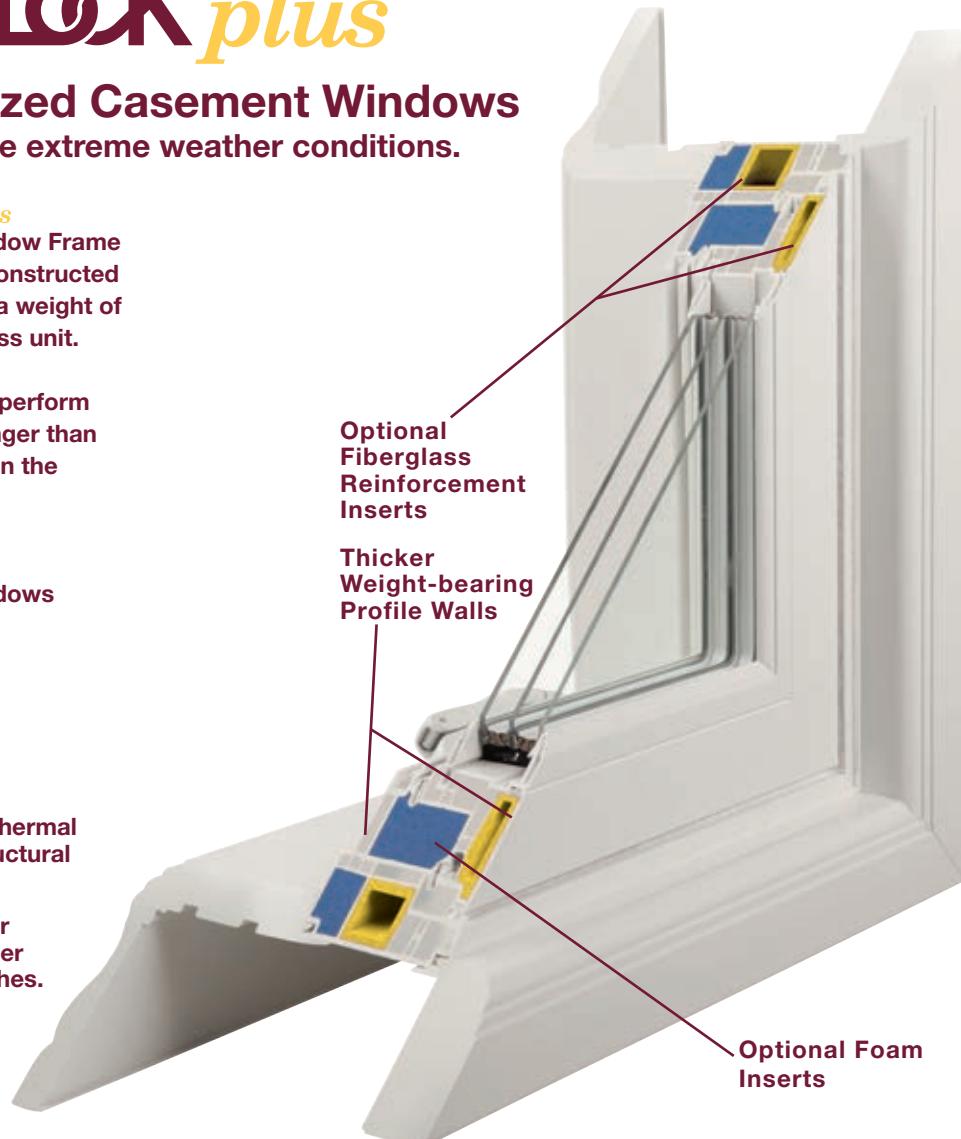

This means it will perform better and last longer than similar windows on the market today.

draftLOCK *plus* Triple Glazed Windows incorporate 1 3/8" glass units.

OPTIONAL ON DraftLOCK PLUS SERIES

For even greater thermal efficiency and structural integrity:

1. Foam Inserts for multiple-chamber frames and sashes.
2. Fiberglass Reinforcement Inserts.

draftLOCK *plus* certified high performance Energy Star windows, with their uniquely sealed LoĒ glass units, will let you enjoy the sunlight for they are specifically designed to deal with intense solar heat gain and destructive UV exposure regardless of the season.

Canadian Choice Windows & Doors reserves the right to make product improvements or modifications in design and construction without notice. The color of foam and configuration of foam filled chambers may vary.

Smart Glass Home Analysis for Maximum Individual Room Comfort

1. Rooms May Be Too Warm or Too Cold

Every room in your home is exposed to various degrees of sunlight in the summer and cold winds in the winter.

This results in some rooms always feeling too warm while others always feeling too cold. Not the most comfortable of situations.

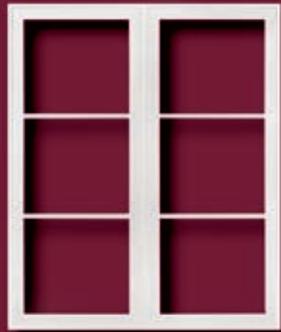

2. We Will Analyse Your Home

Our Representative will analyse your home and the unique issues pertaining to every room and will determine what is causing some rooms to be too warm or too cold.

3. Advise on which Windows & Options will Maximize Individual Room Comfort

Once our analysis is complete, our Representative will advise on which windows and options would be best suited to ensure that you experience maximum comfort regardless of which room you happen to be in.

Casement and Awning Style Windows

Casement Windows are an excellent choice when it comes to protecting your home from the most severe weather or from intruders.

They open wide and outward like a door for the largest unobstructed opening of any style of window.

They can be easily combined with fixed picture windows and various accessories giving you a wide selection of design options.
